Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6,8-19,21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Altman et al (6358247).

Altman teaches a helical electrode which is attached to conductor 102 and which is hollow and therefore allows drugs to exit from the tip. The apertures 116, 118, 120, 122 also allows drugs to exit. Since the helical electrode is hollow, and connected to the reservoir, it can be considered a part of the drug reservoir, see col. 9, lines 14+. Figure 3a shows a housing that contains cavities 312 from which drugs elute.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Altman et al.

To make the cavities of Altman extend from one side of the helix to the other would have been obvious since such would allow for a greater flow of drugs to the tissue at the required depth of penetration.

5. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Altman et al in view of Barcel et al (5267564).

The use of glass frit is common in the art, as shown by Barcel, and would have been obvious to use with Altman due to its superior performance in implantable leads.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holleman et al, Berthelsen et al, and Maoddeb all teach many of the features of applicant's claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (703) 308-2997. The examiner can normally be reached on M-F, 9-5.
